# OUR SUSTAINABLE APPROACH

## ▪ SUSTAINABLE EXHIBITION STANDS IN 4 STEPS ▪

Eco-friendly planning does not only save the environment, but also can lower your expenses! Take these 4 keywords into consideration when outlining your tradeshow presentation:

» SAVE » REDUCE » RE-USE » RECYCLE

Constructing one flexible stand display for several shows will reuse many components and will save money long-term, while ensuring your corporate ID is met throughout different tradeshows.

- » your money as our entire business-model centres on enabling our clients to re-use their exhibition stands over an entire events and exhibition calendar.
- » resources by avoiding bulky construction. The exhibition design already changed from bulky closed designs to more modern, light, open and a more inviting atmosphere.

- » your carbon dioxide footprint shipping and transportation by using shared services
- » your exhibition costs

- » clients printed graphics several times and to wrap and protect materials afterwards
- » our aluminium frame stand build system hundreds of times and wooden elements and carpet to build new crates

- » our used aluminum with our local community recycle station to lead it back to the recycling cycle
- » fabric banners at the end of life together with our supplier

*we are green!* ...and  
**ORANGE OF COURSE!**

# OUR SUSTAINABLE APPROACH

## ■ SUSTAINABLE EXHIBITION STANDS IN 4 STEPS ■

### Certification to Nordic Swan

All used UV inks carry the Nordic SwanLabel – a Scandinavian eco-label. Only products that meet certain requirements regarding their raw material origin and composition, their emission limit values during production and some other ecological and social criteria are licensed by the Nordic Ecolabelling Board.

### Water based inks

We process mostly water-soluble printing inks. Therefore, our print products can be safely used even in sensitive areas such as shops and living rooms.

### Certification according to the Ökotex standard 100

Of course, our textiles are tested for harmful substances and certified according to Oeko-Tex Standard 100.

The Oeko-Tex® Standard 100 is a globally standardized testing and certification system for textile raw materials, intermediate products and end products of all processing stages. Textile trust – the worldwide synonym for responsible textile production.

**Ray Bloom,**  
Chairman IMEX Group

“I have had the great pleasure of working with Walter Foletti since 1988 when I launched my first meetings industry trade show in Geneva. His professionalism and good humour, and that of his team, have been a great asset to us over the years.”

**Rajeev Kohli,**  
Joint Managing Director  
Creative Travel

“I have had the pleasure of working with the fairservices team for over 15 years now and in them I have someone who not only understands us, but even challenges us and pushes us to be even better than what we want.”
